◯ unify

Unify + AI

Empower your people to embrace AI and drive creativity, efficiency, and productivity.

For every employee that's excited about AI, there's one that is apprehensive, too. How can you help everyone embrace AI so you can unlock its full value?

One word: **Unify.**

Our Approach

Unify's AI and organizational effectiveness experts partner with your leaders to co-create a change and adoption solution that is right for your organization, culture, and people.

DISCOVER

We identify stakeholders and their objectives and metrics to uncover needs and get aligned.

FOUNDATION

We co-create a strong vision and success measures and then train influencers to build knowledge and excitement.

INVITE USAGE

We go beyond basic training to create events that are fun and engaging to give users a chance to explore and learn.

ITERATE & SCALE

We map processes, recommend specialized usage, and hone our approach to build functional and supported communities.

Unify knows AI and knows how to move you forward confidently.

Unify has the experience to proactively identify and address potential pitfalls, minimize costly errors, and maximize the value and efficiency of your AI solution. Unify can help you gain a competitive advantage by:

Creating a measurable vision for your AI goals that lets you measure baseline usage, sentiment, and process efficiencies.

Establishing policies and focused training around safe and responsible use, data security, DEI and training models.

Upskilling team members by drawing on leaders and early adopters as your team learns to engage more deeply with AI.

Building new habits through influencers, community development, events and tools to see new productivity benefits faster.
