Unify + AI

Find clarity in the chaotic AI landscape and unlock value to stay competitive.

Your competition is leveraging AI and moving fast. How can you stay ahead and achieve value from AI and advanced analytics initiatives?

One word: **Unify.**

Our Approach

Ready to cut through the AI noise in the marketplace and gain a competitive edge?

Our AI strategy focuses on providing clarity by delivering an actionable strategy and roadmap that aligns with business value and allows the client to stay competitive in the market.

ASSESS

We dig deep to understand your business strategy and where AI can both support and accelerate.

STRATEGY & PLANNING

We develop the operating model architecture, and roadmap to enable AI competitiveness, as well as an AI use case prioritization model.

EXECUTION

We build & deliver high-priority, short time-to-value solutions.

Unify knows AI and knows how to move you forward confidently.

Unify has the experience to proactively identify and address potential pitfalls, minmize costly errors, and maximize the value and efficiency of your AI solution. Unify can help you gain a competitive advantage by:

Establishing an AI strategy and COE to set new standards and provide structure based on business use cases.

Implementing an analytics operating model that provides oversight and governance while fostering innovation efficiency.

Understanding the current data landscape and capabilities while designing the to-be environment and roadmap to implement.

Designing and delivering and AI Learning & Development plan that reduces adoption resistance and shortens time to value.
